Dear Hiring Staff,

I'm reaching out about this available job opportunity. I'm looking for a career in computer engineering - computer programming, networking, game development, and/or database management. I'm in my third year of college, starting at Kirkwood and now at Iowa State University, pursuing a Computer Engineering major and Physics minor. I've always been talented in math and science, consistently scoring in the 99th percentile or higher on state-level assessments during high school and earning a 3.99 GPA in college. I have a lot of enthusiasm for personal projects: exploring and teaching myself new skills. I'm eager to apply for this opportunity, which could start my career in Engineering and Computer Science!

Are you wondering about my accomplishments and skills? Some of mine include:

- I'm an "overachiever". Each project I start, I apply different concepts learned in class and build on them. I've started a geography website, a Java calculator, and a game in Unreal Engine.
- I have a great foundation in coding. I've earned certifications online and constantly learn more about computer hardware and software. At Kirkwood, I have taken Java, HTML, CSS, Python, and Computer Concepts (hardware and software troubleshooting concepts).
- I maintain impeccable time management by joining a couple of clubs and working as a student employee. I communicate with my employers and advisors to plan, study, and pull straight As on top of it all.
- I think critically and adapt to new concepts. I spend a significant amount of time outside of class studying, reading, practicing problems online, and applying them to my own projects, as I mentioned before. Whenever something is difficult, I conceptualize it and apply it to solve problems in class.
- I volunteer: I volunteered for about 10 hours a week at my old high school as a tutor. I also plan to find ways to be part of the community and its events, whether volunteering or attending.

These are some examples of my traits and accomplishments. I desire to work in STEM, and I'm eager to join your future endeavors: to learn, grow, improve, and reach my envisioned career.

Sincerely,
Skylar Hollett

EDUCATION

Iowa State University, Ames, IA — B.S. Degree — Projected December 2028
(IN PROGRESS) Computer Engineering, **Honors**, minoring in Physics (Institution 4.0 GPA).

Kirkwood Community College, Cedar Rapids, IA — *A.S. Degree* — Obtained May 2026
Honors, PTK, Engineering transfer (3.99 GPA).

AWARDS

Academic Achievement - Made the Dean's List 6 times at Kirkwood, maintaining a GPA close to 4.0.

Kirkwood Foundation Scholarship - I received a scholarship, which inspired me to expand and volunteer as a tutor at my old high school. That taught me good communication and teaching skills.

SKILLS

Languages (*-fluent) - ***Java*, C, CSS, HTML, JavaScript, Python**
Languages (Practice) - **C++, MATLAB, Verilog**
Methodologies - **Agile, Scrum, Waterfall**
Other - **Computer Building, Inventor CAD Design, Unreal Engine Game Development, Quartus, Questa**
Microsoft: Access, Excel, Word
Very Strong STEM foundations - 99th percentile in Math and Science throughout grade school

EXPERIENCE

ISU Dining, Ames, IA — *UDM Dining Staff* — August 17, 2026 - Present

Kirkwood Learning Commons, Cedar Rapids, IA — *Learning Assistant* — August 2024 - May 2026
I worked as a Walk-in Learning Assistant at the Learning Commons, helping with classes spanning from basic math, liberal arts, and sciences to advanced courses like Calculus 2, Physics 2, software development, and differential equations.

ARKC Kids Club, Anamosa, IA — Student *Supervisor* — November 2022 - July 2025

St. Paul Lutheran Church, Anamosa, IA — *Technology Management Intern* — January 2021 - November 2023

PROJECTS

Class Project - Kirkwood Software Design — Spring 2026
The project was 5 weeks long: building a 2D "Escape the Dungeon" video game with randomization and NPC enemy interpretation. Overall, my team maintained strong communication and organization using Scrum. The project went perfectly, and we finished the game with everything we wanted plus extra goals.

Mission Trips - YouthWorks Nonprofit — July 2021/22/23
Trips: Saint Louis, Quad Cities, and Milwaukee (dates listed, respectively).
I cleaned, mowed, hosted a carnival, and supported businesses that help the impoverished and disabled.

Honors Project - Kirkwood Honors Program — Fall 2024
The Kirkwood Honors Program accepted and funded an independent study. The study was a Udemy course to learn C++ and game development in Unreal Engine. I built a foundation in how the engine and language work, but I plan to revisit and improve again in the future.

Home Projects - Personal soft skills — Periodically Continuous
I have online practice through Codecademy, Udemy, and Khan Academy for math and coding. I've built about 4 desktops, including troubleshooting; worked on cars, including removing an engine; also, I started building a world geography website from scratch with HTML, CSS, JavaScript, and possibly a framework in the future.

LEADERSHIP & INVOLVEMENT

Phi Theta Kappa (Kirkwood) - I'm a member of the PTK honor society. I attended and caught up periodically. 8/24-5/26

STEM Club (Kirkwood) - Attended periodically to learn new things and listen to speakers. 8/24-5/26

Pickleball Club - I joined the pickleball club and play roughly weekly. 8/26-Present

CyMath - I signed up as a tutor for CyMath and am occasionally tutoring this semester. 8/26-Present
